

AlpsLife

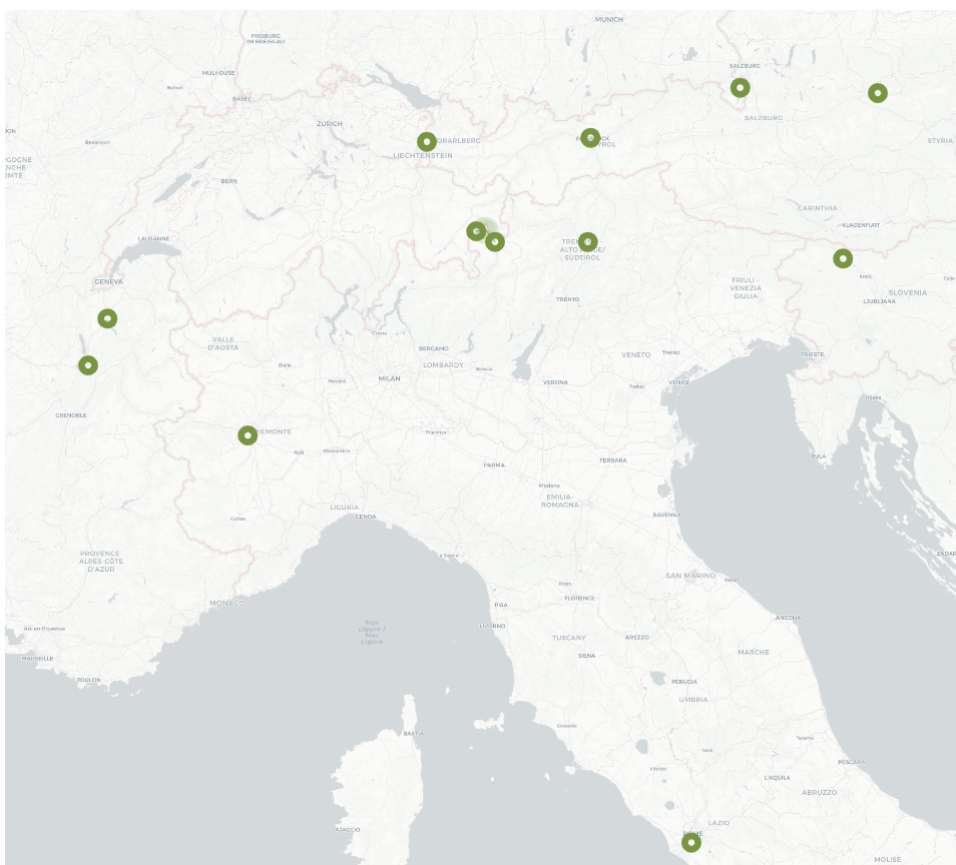

SUPPORT BY THE EUROPEAN UNION
THROUGH THE INTERREG ALPINE SPACE PROGRAMME:

€ 2,082,132.30

Protect Alpine Life by monitoring and managing Alpine biodiversity for the future.
"Observing globally, acting locally"

AlpsLife promotes science-based strategies for preserving and restoring biodiversity, facilitating transnational strategies. It uses EU-wide relevant ecological indicators to monitor some aquatic and terrestrial Alpine ecosystems. It combines existing monitoring schemes and different data sources to ensure the comparability of results between Alpine states. This enables a better understanding of Alpine biodiversity trends and the implementation of appropriate cross-border management measures.

Duration
From September 2024
to August 2027

Partners

Eurac Research (Lead partner)

University of Innsbruck

ALPARC – the Alpine Network of Protected Areas

CIPRA International Lab GmbH

Italian Institute for Environmental Protection and Research

Berchtesgaden National Park Administration

Triglav National Park

Gesäuse National Park

Asters, Haute-Savoie Conservatory of Natural Spaces

Gran Paradiso National Park

Swiss National Park

ERSAF – Stelvio National Park
